1.0 PERFORMANCE WORK STATEMENT (PWS)

The Contractor shall provide and install an alarm system for each residence covered under this contract. The alarm systems provided shall interface with a central alarm monitoring system (CAMS), via telephone lines as appropriate based on a Contractor survey of the locations and environment. The system, when activated, shall communicate with the CAMS monitored by U.S. Embassy security personnel. Additionally, the contractor will provide training to U.S. Embassy security personnel in three main areas: (1) operation of the Central Alarm Monitoring System, to include basic trouble-shooting and use of the interface; (2) operation of the alarm panel to be installed in each residence, i.e. how to arm/disarm, etc.; (3) trouble-shooting for alarm technician personnel, i.e. basic trouble-shooting to include typical malfunctions, broken sensors, etc. The contractor will provide technical assistance and maintenance for the term of the contract. Upon installation, all components will become permanent property of the U.S. Embassy.

All lists of materials/parts and the contractors work plan showing the work elements, time-line and schedule of work will be submitted in 3 copies to Contracting Officer's Representative (COR) for approval prior to beginning work at the residence/s. The work plan shall include a list of workers' names and vehicles to be used in the project.

The Contractor shall perform all work described in this document and that not expressly mentioned in the specifications, but obviously necessary for the proper execution of the same. It is not the intent to delineate or describe every detail and feature of work. No additions to the contract sum will be approved for any materials, equipment, and/or labor to perform work hereunder unless it can be clearly shown to be beyond the scope and intent of the drawings and specifications and absolutely essential to proper completion.

1.1. Furnishing and Installation of New Alarm Systems

The contractor shall furnish, install and activate new alarm systems according to the following minimal requirements for the Chief of Mission Residence (CMR), Deputy Chief of Mission Residence (DCR), approximately 170 high-rise apartments and approximately 20 low-rise apartments. The contractor shall not deviate from the following without prior approval of the COR.

1.1.1. Description

The contractor will conduct a survey of each residence, or at minimum a sample residence from each property in which the Embassy leases apartments. The purpose of this survey will be to address any issues affecting the proposed plan before beginning work and to determine any accessible openings requiring contacts.

The Contractor will propose appropriate alarm models, with components, and a central alarm monitoring system before beginning work. Specifications will be agreed upon based on market availability and security requirements.

The Contractor shall provide, install, and program a functionally complete alarm system per manufacturer's guidelines. Alarm panels/keypads will have a duress button, with one of those keypads being installed in a designated "safe-haven." Contact points shall be installed at all passable openings

(windows and doors), as determined in the survey of the residence (typically below the third floor), or as determined by the COR. Alarm components should minimally include:

<u>Quantity</u>	<u>Component</u>
1	Central Alarm Panel
1	24 Hour Battery Back-Up
2	Keypad with LCD screen (with panic button)
2	Wireless Panic Button (Key-Fob Transmitter)
TBD	Wired Magnetic Contacts/Wireless Transmitters with Switches (TBD)
TBD	PIR Motion Sensor for Ground Floor/Select Residences
1	Outdoor Speaker/Siren (CMR/DCMR only)
1	Indoor Speaker/Siren (if not included in keypad)
TBD	Electrical Connection
1	Cellular/Landline Reporting to CAMS
TBD	Wiring
TBD	Long-Life Batteries for Components

All installed alarms will communicate with a central alarm monitoring system to be installed at the U.S. Embassy. Contractor provided monitoring service is not requested or covered under this contract.

Task orders will be issued for each installation required.

In the case of wireless sensors/transmitters, long-life lithium batteries to be used only for backup power shall be provided with the equipment. The alarm systems and all components shall meet or exceed commonly accepted U.S. industry standards for design, reliability and performance for the detection of unauthorized intrusions while minimizing the number of “false” alarms.

The Contractor will furnish and perform all cabling in such a way as to cause as little damage and visible disruption to the residence interior as possible. The Contractor shall fit all cabling into new or existing panduit.

The COR will rely on the contractor’s professional judgment regarding the placement of all alarm components, associated electrical wiring and connectivity cabling, ensuring intrusion detection at any residence. However, if during the performance acceptance inspection by the COR it is found that, due to a misjudgment by the Contractor, the installation shows weak spots where the intended security of a location is compromised or that additional equipment/sensors are needed, the COR shall have the right to request the Contractor to move the placement of any alarm system component installed by the Contractor until satisfactory security coverage is reached (without extra cost to the Government), and/or request additional components.

The Contractor shall complete the programming of the alarm system based on specifications determined in advance with the COR and shall not lock the alarm control panel to prevent editing or revising the programming.

Each installation will be followed by a complete testing of the system, including a test of each system component, by the Contractor. The Contractor shall replace inoperable alarms within twelve (12) hours from when the test is completed. If the Contractor needs to deviate from the twelve (12) hour requirement, the request for deviation shall be in writing to the COR for approval and shall be of no cost to the USG.

1.1.2. Access

The Contractor shall ask the COR in writing for permission to access properties covered under this contract. The Contractor may make oral emergency requests followed up by a written request on the

next business day. The Contractor shall not make requests for access for routine maintenance directly to the resident or landlord.

1.1.3. Type of Equipment

The Contractor shall propose and furnish only equipment that is adequate to complete performance under this contract.

The Contractor shall be an authorized and trained dealer of the system and shall be trained and certified to maintain/repair the system after acceptance.

1.1.4. Installation Warranty

The Contractor shall warrant all the systems furnished and installed by the Contractor against troubleshooting as a result of faulty or inappropriate installation for 2 years. The Contractor shall correct any such faults without charge to the Government during the term of this contract.

The Government shall notify the Contractor as soon as it has notice or becomes aware of any damage or malfunction of the equipment from any cause.

It is the contractor's responsibility to take all necessary precautions to protect all furnishings and equipment during this project.

The Contractor will be held responsible to repair or replace any damage to Embassy property or residences caused during the installation process.

The Contractor will remove all debris and clean any areas upon completion in each residence.

The Contractor will comply with standard safety practices, OSHA and Department of State safety regulations as directed by the Embassy.

The Contractor shall take all necessary precautions and safety procedures to protect its employees and Embassy employees for the duration of this project, i.e.; use of safety equipment and clothing such as eye protection, ear protection, gloves, protective screens etc.

1.1.5. Maintenance Agreement

The Contractor shall offer extended service/maintenance agreements up to four years after the warranty expires. The agreement shall be renewable monthly, quarterly, or yearly. These maintenance agreements shall include:

- (1) Annual Basic Maintenance Service (for each residence), to include checking alarm history, visual inspection of all alarm components, check and test of positioning of and function of all sensors, check and test of all audible warning devices, check and test of remote signaling/reporting, brief retraining of residents on basic use of in-home alarm panel/keypads.
- (2) On-Site Service/Trouble-Shooting/Repair, to include sending technical staff to identify problems within 12 hours of notification, 0900-1700 hours. Contractor technical staff will identify and trouble-shoot and repair or replace alarm and/or components as necessary.
- (3) Pricing for service and repairs determined by agreement between the contractor and the COR to be the fault of the tenant and/or customer (U.S. Embassy).
- (4) Pricing for the purchase of spare parts to be purchased by the U.S. Embassy.

1.1.6. Removal of Installed Alarm Systems

When directed by the COR, the contractor shall remove alarm systems installed under this contract, to include removal of all cabling. The Contractor shall use maximum care as to cause minimal damage to the building while removing the alarms and cabling. All removed parts remain the property of the U.S. Embassy and will be returned to the COR or installed at a different residence as directed by the COR.

1.1.7. Use and Training

Upon completion of the installation, the Contractor shall furnish training on the complete operation of the alarm system and CAMS, routine maintenance and troubleshooting to designated Embassy staff. In general, the Contractor will provide training in three main categories: (1) Central Alarm Monitoring System (CAMS), (2) basic alarm operation for users, (3) basic alarm trouble-shooting. Pricing for this service shall be included in the contract.

- (1) CAMS Training: The Contractor will provide U.S. Embassy Security Personnel with appropriate training on the chosen system to include the CAMS interface, alarm acknowledgement/acceptance, panic alarms, and basic trouble-shooting.
- (2) Basic Alarm Training: The Contractor will provide U.S. Embassy Security Personnel and apartment residents with appropriate training on the alarm panel, keypad(s), wireless duress button(s), and other components. The Contractor will also provide instruction on how to arm and disarm alarms from the residence and to accept or cancel intrusion/duress alarms. The Contractor will also provide English and Turkish instruction manuals for each residence.
- (3) Basic Trouble-Shooting: The Contractor will provide U.S. Embassy Security Personnel with appropriate training on how to address/trouble-shoot potential routine malfunctions resulting from faulty wiring, broken/malfunctioning sensors, poor contact points, etc.

1.1.8. Schematics/Diagrams

The Contractor shall provide to the COR an alarm schematic/diagram for the CMR, DCMR, a standard high rise apartment and any other units deviating from the standard, detailing where, and what type of sensors have been installed, within ten (10) days of installation.

2. WORK SCHEDULE

The contractor shall conduct all work on the contract, its task orders and any amendments according to the following minimal requirements. The contractor shall not deviate from the following without prior approval of the COR and the RSO.

2.1. Installation

Each individual newly installed alarm system must be completed, made operational and tested within maximum one (1) working day (9:00-17:00).

Prior to beginning the work specified in the contract, the contractor will provide estimates for time required to complete installations at each type of residence. A timeline for phased installation will be provided by the COR, noting phased completion deadlines and the number of residences to be completed quarterly over the duration of the contract, using these estimates. Additional residences may be added or residences removed from the list by the COR.

The contractor will ensure that an appropriate quality control process is in place that includes functions tests of all components for reliability and connectivity inside the residence as well as to the planned CAMS.

2.2. Appointments

Individual appointments with residents for the installation of new alarm systems will be made by the COR. The COR will give the Contractor a task order with at least five (5) working days' notice before each individual installation/activation appointment.

3. TASK ORDERS

The Contracting Officer will issue task orders to the Contractor to perform any work under this contract. If a task is given orally, it will be followed up by a written task order within two (2) days of the oral order. All task orders will be in written form, state the manner of the work to be performed, and have an issue date and a date by which the work is to be completed.

4. PROJECT MANAGEMENT AND SUPERVISION

In view of the importance of this project, the Contractor shall assign a specific English speaking project manager who will be the direct liaison with the COR concerning all work related to this contract. It will be the project manager's task to direct, schedule, supervise, inspect and test the work under this contract, and to receive instructions from the COR or their designate. The Contractor's project manager shall be able to speak and understand the English language at Level 2. Level 2 is defined as being able to verbally satisfy routine demands and limited work requirements, and being able to comprehend simple written material on subjects within a familiar context.

Quality control shall be the responsibility of the project manager. The project manager shall perform inspection visits to the work site on a regular basis.

5. REPORTING

Monitoring of the alarm system will be conducted solely by the U.S. Embassy through the installed CAMS. No other monitoring services are requested as part of this contract, and to the extent that the contractor's alarm systems utilize a central monitoring center owned and operated the contractor, the Embassy is (1) not interested in using this service, and (2) will require via the contract that the alarm systems installed be able to fully function without the use of said service. The alarm technology shall not require the use of any off-site monitoring or routing through a contractor-owned central monitoring/receiving point; the U.S. Embassy shall be the sole monitors. The CAMS shall include an alarm monitoring computer with an appropriate interface (i.e. touch screen or computer with monitor and mouse). Upon alarm activation the computer will display the date, time of alarm activation, and residential location by code (such as, location #126 at 20:55) and store the alarm message.

The CAMS shall be able to provide a hardcopy record of each alarm activation to include the residence (by code), the date and time of activation and the resolution of alarm situation. The COR shall be able to obtain these reports, as required.

6. SUBCONTRACTING

The Contractor shall not subcontract any work to be performed without the express consent of the Contracting Officer.

7. DEFINITIONS

“Central Alarm Panel” is the central processing unit for the residential alarm system and receives alarms from within the residence and then sends to the CAMS and/or activates the audible alarms. This panel may also serve as a basic component allowing arming/disarming, programming, etc.

“Keypad” is a component used to arm/disarm, and program the alarm system. Commands are entered by pressing various buttons on the unit.

“Transmitter” is the primary transmitter that establishes a radio signal link for communication between the Central Alarm Panel/Control Box and the CAMS at the base operations center. Smaller transmitters also send wireless signals from alarm components inside the residence to the Central Alarm Panel.

“Receiver” is a component which receives signals from the wireless alarm sensors/transmitters and relays data to the control box for processing.

“Door/Window Contact Sensors” are magnetic-type sensors that are mounted on windows and doors to signal when they have been opened.

“Motion Sensors” are sensors which utilize one or a combination of several different technologies to detect the motion of an intruder and signal his/her presence in a protected zone. Common technologies used include employment of passive infrared (PIR) and/or microwave signals.

“Wireless Panic Buttons” are small, remote-control-type units that can be carried on one’s person in or near the protected property. In case of an emergency, the button can be pressed to signal for assistance from a React Team.

“Exterior Siren and Strobe Light” consist of an audible alarm and flashing light which are mounted on the exterior of the protected property. When activated they clearly signal to neighbors, passersby, or responding authorities that an apparent unauthorized entry is in progress and may also deter an intruder from continuing illegal activity and cause them to flee.

“Panduit” means the cable ties that are used to secure the cabling and wiring to the interior and exterior walls.

“American Embassy”, “U.S. Embassy”, and “Embassy” mean the diplomatic or consular mission of the United States of America in Ankara for which services are provided under this contract.

“Department” means the Department of State, including all of its activities wherever located.

“Government” means the Government of the United States of America unless specifically stated otherwise.

8. INSPECTION BY GOVERNMENT:

The services and the supplies furnished will be inspected from time to time by the COR, or his/her authorized representatives, to determine that all work is being performed in a satisfactory manner, and that all supplies are of acceptable quality and standards.

8.1 QUALITY ASSURANCE AND SURVEILLANCE PLAN (QASP)

This plan provides an effective method to promote satisfactory contractor performance. The QASP provides a method for the Contracting Officer's Representative (COR) to monitor Contractor

performance, advise the Contractor of unsatisfactory performance, and notify the Contracting Officer of continued unsatisfactory performance. The Contractor, not the Government, is responsible for management and quality control to meet the terms of the contract. The role of the Government is to monitor quality to ensure that contract standards are achieved.

(h) *Certification Regarding Responsibility Matters (Executive Order 12689)*. (Applies only if the contract value is expected to exceed the simplified acquisition threshold.) The offeror certifies, to the best of its knowledge and belief, that the offeror and/or any of its principals—

(1) *o* Are, *o* are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2) *o* Have, *o* have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(A) *The tax liability is finally determined*. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. (B) *The taxpayer is delinquent in making payment*. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) *Examples.*

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. §6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. §6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. §6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. §362 (the Bankruptcy Code).
